

Team,

In an effort to reduce our overhead spending I am looking to dial back on our training DAN (X0007) that will be used for the upcoming GD&T Training. If you are familiar with GD&T and taking this class for a refresher please let me know so I can reschedule you for training later in the year or next year. If you are new to GD&T, please stay enrolled in our up-coming session (I would rather be under our yield target if it means that you are gaining a skillset that you will need!). Please let me know one way or another by responding back to me.

Thanks,

Jerry
